International Plantscape Awards

“Woodbury Modern Rustic Front Entrance”

After the homeowner renovated her home, the existing hardscape design and materials were dated and did not complement the new architecture. The goal for the project was to completely recreate the aesthetic and functional value of the driveway, front walkway, steps, porch, and front landscape.

BLONDIE'S TREEHOUSE INC

Our task was to create a space that allowed for increased parking, a comfortable walkway, steps, and a landing leading to the front door. Beyond the hardscape elements, the goal was to create a landscape that would frame the house, offer scale, provide four-season interest, and feature plantings, that not only provide various heights and textures but also sequential blooming waves of color.

ACTIVE USE AREA ^ \$150k

“The Flower Hill Club” by Blondie’s Treehouse

This client expressed his desire to create a Spectacular backyard where he could have many guests of all ages and different interests all enjoying the yard simultaneously!

While many elements would be used only during the warmer months, four-season use was an absolute must for the pavilion, the grill and pizza oven, the firepit, and the putting green.

In addition to being an avid golfer, they love to entertain and have friends and family over as much as possible. The “wishlist” included, a pool, outdoor kitchen island, cedar pergola, firepit, dining area for 10-12, two lounge areas, pavilion with a wood burning fireplace, putting green, synthetic turf lawns, extensive mature landscape for privacy and four season interest.
