RE: [EXTERNAL] 2022 Building Code and Main Relief Valves

LG Laura Grieco (Buildings) <lgrieco@buildings.nyc.gov>
To Adam Levine, P.E.
Cc Robert Holub (Buildings); Tarek Omar (Buildings)

i You forwarded this message on 4/3/2024 2:18 PM.

Hi Adam,

Tarek Omar did some digging and we are adding this to the list of things to revisit during committee meetings for Appendix Q. Regardless of how it's written now (aka missing a sentence), we interpret that the intent was always to not require relief valves for special service fire pumps and sprinkler booster pumps.

Regards,
Laura

Case Study

- **Expertise in Code Compliance:** We know the code forwards and backwards because we wrote it!
- **Strategic Relationships:** We have meaningful relationships with the Department of Buildings, FDNY, and local fire marshals. We can (often) cut through the red tape!
- **Client-First Ethic:** Our commitment to doing what's right for our clients saved them money by prioritizing their interests—even when it means forgoing additional revenue opportunities.

Questions?
